REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claim 13 is patentable over the prior art patents and printed publications because of the specific laser marking method using a toner-free process to inscribe a sheet-like active agent-containing therapeutic system having an adhesive side and an adhesive-free side and comprising at least one active ingredient-containing layer, a material layer to be inscribed and a backing layer, the method comprising placing the sheet-like active agent-containing system with the adhesive side facing a support position, guiding the laser emission device to emit the laser beam onto the sheet-like active agent-containing therapeutic system by a program of a manually operable central control unit, and controlling the intensity and penetration depth of the laser beam according to the material properties of the sheet-like active agent-containing therapeutic system such that the laser beam does not penetrate far enough to reach one of the active ingredient-containing layers and preventing a detrimental influence on the ingredients contained in the system. The combined limitations are not taught by the art of record alone or in combination.

Claims 15-25 are allowed because they are directly or indirectly dependent from claim 13 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
